LA NOSTRA STORIA E I NOSTRI OBIETTIVI RACCHIUSI IN QUESTE PAGINE.

Il nostro cuore è italiano ma la nostra mente ci fa viaggiare in tutto il mondo, in ogni sport e a qualsiasi livello

Dal 1988 produciamo capi sportivi e tecnici in grado di migliorare le performances di chi vive e ama lo sport, assicurando i massimi standard di qualità, sicurezza e comfort. Il servizio e la cura del cliente sono la nostra priorità: la nostra principale e grande responsabilità è la soddisfazione e l'attenzione verso il consumatore. Ci distinguiamo dai principali competitors perché siamo la prima azienda in Europa nel settore teamwear ad avere ottenuto la certificazione Oeko-Tex Standard 100, un ulteriore attestato che ci rende orgogliosi del lavoro svolto quotidianamente. Nella sede di San Polo di Torriale gestiamo l'intera filiera produttiva e lo sviluppo di tutte le fasi di lavorazione del prodotto, dalla selezione delle materie prime alla progettazione dell'aspetto grafico, dalla produzione dei prototipi fino alla consegna del capo finito. Scegliamo di essere produttori perché ci permette di garantire la massima sicurezza grazie a meticolosi controlli interni. L'efficace gestione aziendale si impegna ogni giorno a monitorare e migliorare l'organizzazione e il controllo, ottimizzare i processi, ridurre le inefficienze, contribuendo così alla qualità dei prodotti e servizi. Grazie al prezioso lavoro quotidiano, abbiamo ottenuto la certificazione ISO 9001:2015. Il nostro impegno non si limita alla qualità: Errea promuove inclusione e parità di genere, certificate UNI/PdR 125:2022, e pone la sostenibilità al centro delle proprie scelte, come attestato dalla certificazione GRS che garantisce tracciabilità, responsabilità sociale e ambientale lungo tutta la filiera. Oggi siamo presenti in 80 paesi, in costante ricerca di nuovi mercati e nuove sfide.

Since 1988, we've been producing sports and technical clothing able to boost the performance of those who love practising and experiencing sport, guaranteeing top standards of quality, safety and comfort. Customer service and care are our priority: our primary responsibility is to attend to and meet our customers' needs. What sets us apart from our main competitors is that we are the first company in the teamwear sector in Europe to have obtained Oeko-Tex Standard 100 certification, a further demonstration of why we can be proud of the work we do every day.

The entire production chain is managed at its headquarters in San Polo di Torriale, along with the development of all the manufacturing stages: from the selection of raw materials to the design of the graphics, from prototype production right up to the shipment of the finished garments. We have chosen to produce our own items because it allows us to guarantee maximum safety, thanks to the meticulous checks we carry out in-house.

Every day, our efficient corporate management strives to monitor and improve organisation and control, optimise processes and reduce inefficiencies, thus boosting the quality of our products and services. This sterling effort we make every day has earned us ISO 9001:2015 certification.

Today we are present in 80 countries and constantly on the lookout for new markets and challenges.

Depuis 1988, nous produisons des articles sportifs et techniques en mesure d'améliorer les performances de ceux qui vivent et aiment le sport, en assurant les plus hauts standards de qualité, de sécurité et de confort. Le service et le soin du client sont notre priorité: notre grande et principale responsabilité est la satisfaction et l'attention envers le consommateur.

Nous nous distinguons par rapport à nos principaux concurrents car nous sommes la première entreprise en Europe dans le secteur du teamwear à avoir obtenu la certification Oeko-Tex Standard 100, une attestation supplémentaire qui nous rend fiers du travail réalisé quotidiennement. La gestion de l'ensemble de la filière de production ainsi que le développement de toutes les étapes de réalisation du produit, sélection des matières premières, projet graphique, production des prototypes et livraison des vêtements finis ont lieu au siège de San Polo di Torriale. Nous choisissons d'être producteurs car cela nous permet de garantir la sécurité maximale grâce à des contrôles méticuleux que nous réalisons en interne.

Grâce à une gestion efficace, l'entreprise s'engage chaque jour à suivre et à améliorer l'organisation et le contrôle, à optimiser les processus, à réduire les inefficacités, contribuant ainsi à la qualité des produits et des services. Grâce au précieux travail quotidien, nous avons obtenu la certification ISO 9001:2015.

Nous sommes aujourd'hui présents dans 80 pays, à la recherche permanente de nouveaux marchés et de nouveaux défis.

ANTIVIRALE ANTIBATTERICO CERTIFICATO OEKO-TEX

TI-ENERGY: IL NUOVO TESSUTO ANTIVIRALE*

Frutto delle più moderne tecnologie nel campo dei polimeri avanzati e dell'esperienza maturata nell'utilizzo delle nanotecnologie iniziata nel 2008, la sezione Ricerca e Sviluppo di Erreà presenta il **nuovo tessuto antivirale* Ti-energy**.

Si tratta di un importantissimo traguardo raggiunto in ambito tessile ottenuto grazie all'impiego di due distinte tecnologie: la **presenza di nanoparticelle di ossido di zinco** incapsulate in modo permanente nelle fibre di tessuto per ottenere **efficacia antivirale* e antibatterica** e il **trattamento Minusnine J1+** per conferire estrema impermeabilità ai liquidi. Questa duplice funzionalizzazione consente al tessuto di diventare **un'efficace barriera protettiva contro droplet, liquidi, batteri e virus**.

Certificato Oeko-Tex Standard 100, Ti-energy sarà disponibile anche per tutte le società sportive che vorranno utilizzarlo per offrire una maggiore sicurezza ai propri atleti.

*I test eseguiti secondo la ISO 18184, utilizzando il virus SARS-CoV-2, hanno mostrato che il tessuto **Ti-energy®3.0** in laboratorio ha una riduzione della carica virale del 99,85% rispetto ad un comune tessuto in poliestere dopo 6 ore di contatto con il virus.

ANTI-VIRAL ANTIBACTERIAL OEKO-TEX CERTIFIED

TI-ENERGY: THE NEW ANTI-VIRAL* FABRIC

Fruit of state-of-the-art technologies in the field of advanced polymers and of the experience gained in the use of nanotechnologies since 2008, the Erreà research and development team is **presenting Ti-energy, the new anti-viral* fabric**.

This truly important achievement in the world of fabrics was made possible by the use of two separate technologies: **the zinc oxide nanoparticles**, permanently encapsulated in the fibres, **have antiviral* and antimicrobial properties**, and the **Minusnine J1+** treatment which makes the fabric super-impermeable to liquids. This dual function allows the fabric to form an effective **protective barrier against droplets, liquids, bacteria and viruses**.

Oeko-Tex Standard 100 certified, Ti-energy will also be available to all sports clubs that want to use it to enhance the safety of their athletes.

*Tests performed in accordance with ISO 18184 using the SARS-CoV-2 virus, have proved that in the laboratory, **Ti-energy®3.0** can reduce the viral load by 99.85% compared to a standard polyester fabric six hours after coming into contact with the virus.

ANTIVIRAL ANTIBACTÉRIEN CERTIFIÉ OEKO-TEX

TI-ENERGY : LE NOUVEAU TISSU ANTIVIRAL*

Fruit des technologies les plus modernes dans le domaine des polymères avancés et de l'expérience acquise dans l'utilisation des nanotechnologies, qui a débuté en 2008, la section R&D d'Erreà Sport présente le **nouveau tissu antiviral* Ti-energy**.

Cet extraordinaire succès en matière textile est le fruit de l'association de deux technologies spécifiques : la **présence de nanoparticules d'oxyde de zinc encapsulées qui restent dans les fibres** de tissu pour déployer leur efficacité antivirale et antibactérienne, et le traitement **Minusnine J1+**, qui confère une imperméabilité extrême aux liquides. Cette double fonctionnalisation permet au tissu de devenir **une barrière protectrice efficace contre gouttelettes, liquides, bactéries et virus**.

Certifié Oeko-Tex Standard 100, Ti-Energy sera proposé également à tous les clubs de sport qui souhaitent l'utiliser afin d'offrir davantage de sécurité à leurs athlètes.

*Les tests réalisés selon la norme ISO 18184 avec le virus SARS-CoV-2 ont montré que, en laboratoire, le tissu **Ti-energy®3.0** assure une réduction de 99,85% de la charge virale comparé à un tissu commun en polyester au bout de 6 heures de contact avec le virus.

SEAMLESS

La tecnologia a maglia tubolare riduce al minimo le cuciture e offre una grande comodità e traspirabilità oltre ad una vestibilità ergonomica con design sportivo.

Tubular knitting technology reduces seams to a minimum and offers great comfort and breathability, along with ergonomic wearability and a sporty design.

La technologie à maille tubulaire réduit les coutures au minimum, offrant ainsi un confort et une respirabilité importants, et permet de réaliser une coupe ergonomique aux lignes sportives.

THERMOSHOCK'00®

Brevettato da Thermoshoe, nasce da un concetto innovativo: si tratta di un materiale termoplastico stabile con delle caratteristiche uniche che lo rendono adatto alle più diverse applicazioni. Conosciuto più comunemente come GEL, Thermoshock garantisce un maggior assorbimento degli urti, anche in spessori molto sottili.
